PROFESSIONAL SUMMARY

Full Stack Developer (MERN/Next.js) with 1.5+ years of onsite experience. Built production-grade systems including an AI workflow platform and enterprise HRMS. Strong in TypeScript, SSR, REST APIs, and clean code practices.

EXPERIENCE

AllZone Technologies

Onsite

Full Stack Developer

Jun 2025 - Present

- Building full stack web applications using MERN Stack and Next.js with server-side rendering (SSR) for better performance and SEO.
- Designing and building 35+ RESTful APIs using Node.js and Express.js covering auth, data management, and third-party integrations including Cloudinary, Twilio, Nodemailer, Clerk, and AWS S3.
- Developing responsive and dynamic front-end interfaces using React.js, Next.js, and Tailwind CSS.
- Collaborating in a team environment to ship client-facing products with clean, maintainable code.

Software Pro

Onsite

MERN Stack Developer

Aug 2024 - Feb 2025

- Built and maintained 3 client-facing React applications, implementing reusable component libraries and integrating REST APIs for live data.
- Worked with MongoDB, Express.js, and Next.js on real-world projects.
- Contributed to debugging and performance optimization across the codebase.

PROJECTS

[SparkUp.ai – AI Workflow Builder & Marketplace](#) | *React, Zustand, React Query*

- Customized SurveyJS integration for dynamic forms & surveys.
- Developed feedback management & collaborative board features with infinite scrolling, filters, and real-time updates for improved platform usability.
- Built and integrated the Spark Builder UI — a drag-and-drop workflow editor allowing users to create and connect AI-powered steps without any coding.
- Contributed to the Spark Marketplace module, enabling creators to publish, share, and monetize their AI workflows through a public listing system.
- Implemented Spark Board collaboration features, allowing multiple team members to work on shared AI-powered whiteboards with real-time syncing and AI-generated insights.

[HRMS – Human Resource Management System](#) | *Next.js, Node.js, MongoDB*

- Developed a comprehensive HRMS with modules for attendance tracking, leave management, WFH requests, and OPD records.
- Built a client records module and employee birthday tracking system to streamline HR operations.
- Implemented role-based access control for admins, HR managers, and employees with secure JWT authentication.
- Designed and integrated RESTful APIs for all HRMS modules ensuring smooth data flow between frontend and backend.

[Blogging Platform](#) | *MERN, Redux, RTK*

- Developed a full-stack blogging platform featuring category-based content filtering, search functionality, and pagination for seamless content discovery.
- Designed and integrated RESTful APIs with Node.js and Express.js for post management, user handling, and category operations.
- Built a dynamic admin panel with full CRUD operations for managing posts, categories, and users efficiently.
- Improved code reusability and maintainability by following modular component structure and clean code practices.

EDUCATION

The University of Lahore

Lahore, Pakistan

Bachelor of Science in Computer Science

Aug 2020 - Jan 2025

TECHNICAL SKILLS

Frontend: React.js, Next.js, Redux, RTK, TanStack Query, TypeScript, MUI, Shadcn, Tailwind CSS, HTML, CSS, JavaScript

Backend: Node.js, Express.js, Python, REST APIs, JWT Authentication

Database: MongoDB, MySQL

Cloud & DevOps: AWS S3, Docker, Git, GitHub, Postman

Others: WebSockets, Third-Party API Integration

SOFT SKILLS

Problem-Solving | Communication | Time Management | Team Collaboration
